

Specifications – Bimetal Dial Thermometers

Dial Sizes: 1 1/8", 1 3/4", 2 3/8", 3", 4", 5"

Stem Length: Between 2" and 80"

Stem Diameters: 1/4" (standard),
also available 5/16", 3/8".

Heads, bezels, mounting bushing, stems:

All Models 300 series SS

Operating Conditions: The temperature of the head should not be allowed to exceed 200° F (150° F if silicone filled). Stems should not be exposed to continuous temperatures exceeding 50% over-range, or 800° F.

Hermetic seal: All 3", 4", and 5" models (except DM4) are hermetically sealed per ASME B40.3.

Pointed Stems: Optional on all models. Excellent for probing asphalt, compost, soil, frozen foods or other semi-solid materials.

Dials: Anodized aluminum. Black marks and numbers with satin matte finish background.

Crystals: Optically clear strong glass.

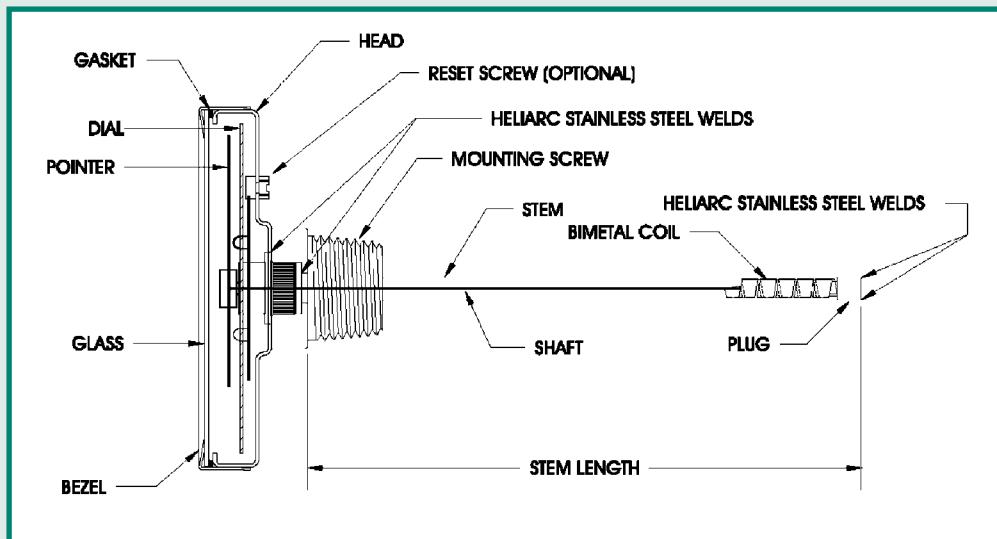

Optional: Unbreakable clear plastic: all models (Not recommended for ranges over 500° F).

Optional: "Shatterproof" tempered glass (3", 4", and 5" models).

Accuracy: All Models are guaranteed accurate to within plus or minus 1% of the full scale (Grade A per ASME B40.3). Temperature readings are stabilized within 40 seconds.

Immersion: For correct temperature measurement, the stem of all Models in all ranges must be immersed 2 inches in liquid, and 4 inches in gas except for 0 to 100° F, 25 to 125° F, and 0 to 50° C which require 3 1/2 inches in liquid and 5 inches in gas.

Mounting Connections: 1/2" NPT (std. on 3", 4", 5" models), 1/8" NPT, 1/4" NPT, 3/8" NPT, 3/4" NPT, 3/8"-24" NF, Plain or Reset Bushing, 1/2" NPT Union, 1/2" BSPT, BSPP Adapters.

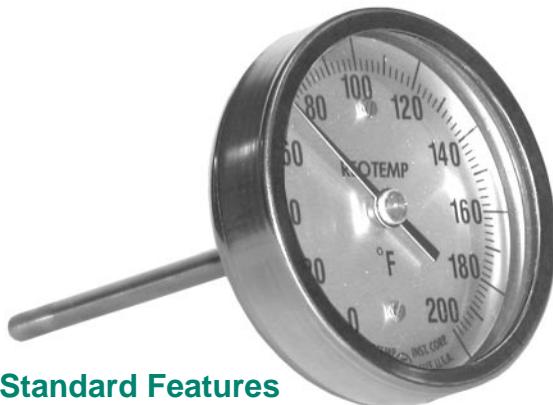

Thermowells

Thermowells should be used whenever the stem or bulb would be exposed to pressure, corrosion, or shear forces. Thermowells also make it possible to remove the thermometer without losing pressure or contents. (See pages 14-15 for more details)

O.E.M. Applications

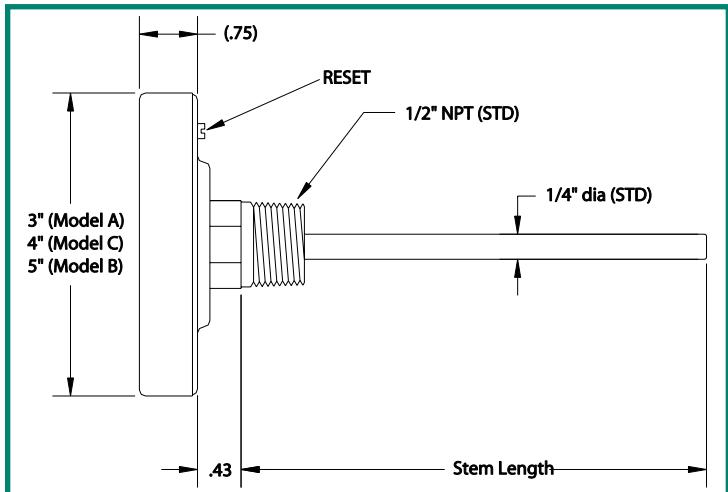

If you are an Original Equipment Manufacturer and plan to incorporate the REOTEMP Thermometer in your finished product for resale, special ranges or special dials can be made to suit your particular requirements. Such specials can bear your own company name and/or trademark on the dial. The quality, appearance, and performance of a REOTEMP Thermometer will complement and enhance your equipment.

Standard Features

- All Stainless Steel Construction
- Hermetically Sealed (ASME B40.3)
- Accurate to 1% of Full Scale
- Standard External Reset
- Silicone Fillable for Vibration

REOTEMP Angle Form thermometers are ideal for local, eye-level temperature readings in most process applications.

Bimetal Thermometers

Temperature Ranges

Accessories

AS-86	Adapter Kit: permits installation of bimetal thermometer in existing mercury-in glass-industrial thermometer thermowell.
HT	Heat Transfer Compound (2 oz, 1 lb containers)
D3	Duct Flange (1/2" NPT)
CH	T-27 spring handle
CP	Pan Clip

Calibration

CC	Certificate of Conformance
C1	1 Point Calibration Certificate
C3	3 Point Calibration Certificate

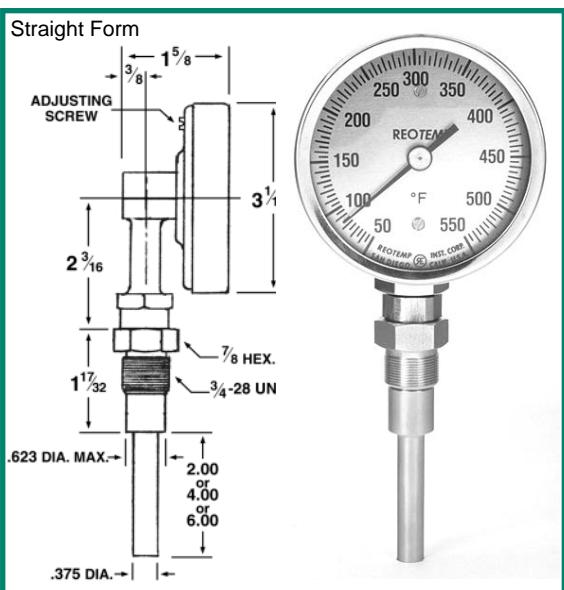

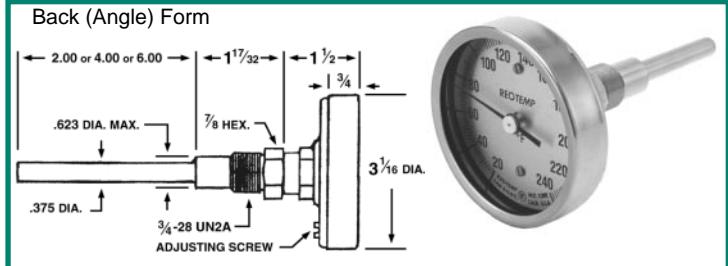

Options

Code	Description	Model
MM	Minimum or Maximum resettable pointer (one hand)	3", 5"
TG	Tempered Glass Lens	3", 4", 5"
PC	Plastic Lens (Acrylic)	All
PY	Polycarbonate Lens	3", 4", 5"
SF	Silicone Filled	3", 4", 5"
SD	Silicone Filled, food grade	3", 4", 5"
GF	Glycerine Filled (200°F max.)	3", 4", 5"
PS	Pointed Stem	All
3H	316SS Head and Bezel	3", 4", 5"
SS	316SS Stem	All
F5	5/16" diameter stem	3", 4", 5"
S3	3/8" diameter stem	3", 4", 5"
F3	3/8" diameter aluminum sleeve	3", 4", 5"
TF	Teflon Coating (stem only)	All
MB	External Mounting Brackets	G, H
TS	Stainless Steel Tags	All
TP	Paper Tags	All
NL	No Logo Dial	All
BQ	BBQ Dial	3"

Also available on request Custom dials, special ranges, special configurations.

Standard Features

- 3" Dial - Bimetal Actuation
- Heavy Duty - Vibration and Shock Resistant
- Stainless Steel - Sealed Construction
- Plastic Crystal
- External Reset is Standard
- 1% Accuracy
- Fits in 5" Scale “Submarine” Thermometer Well
- 3/4" - 28 UN2A Union Connection - (to be used in thermowell)

Bimetal Thermometers
Silicone-Filled Thermometers

REOTEMP Silicone-filled thermometers are offered for severe industrial applications, where vibration is a problem. Silicone dampening prolongs instrument life by preventing wear and fatigue in the instrument's internal parts. The silicone also improves readability by reducing pointer flutter, and promotes faster temperature response. Any REOTEMP 3", 4" or 5" dial bimetal thermometer (except Model DM4) can be silicone filled, in any stem length, and any temperature range up to 550°F. (Silicone filling with ranges over 550°F not recommended.) All silicone-filled thermometers come with a durable polycarbonate crystal.

How to Order

Specify option "SF" at the end of any 3", 4" or 5" dial bimetal thermometer. (e.g., Model AA-040-1-F47-SF). See pg. 4-6

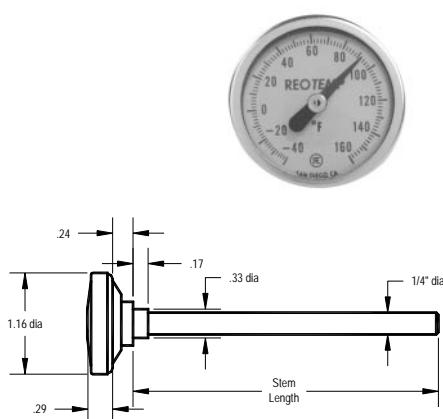

Bimetal Thermometers

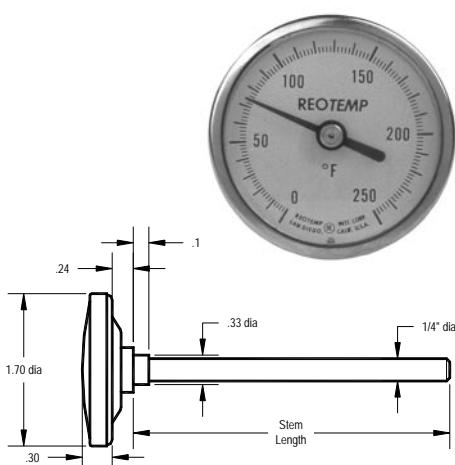

OEM Dial Bimetal Thermometers

REOTEMP OEM Thermometers (Models Q, G, and H) are the perfect choice for equipment with limited space and requiring a rugged, dependable and economical temperature sensor. Available with a wide variety of mounting threads.

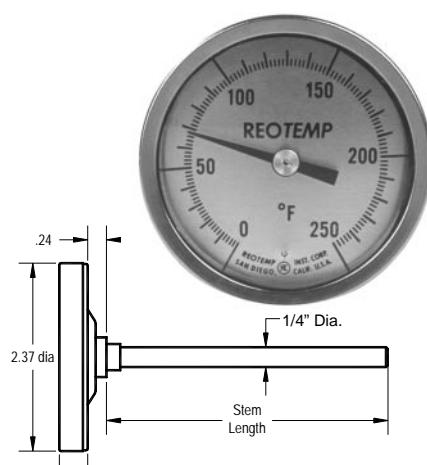

Model Q - 1 5/32" Dial

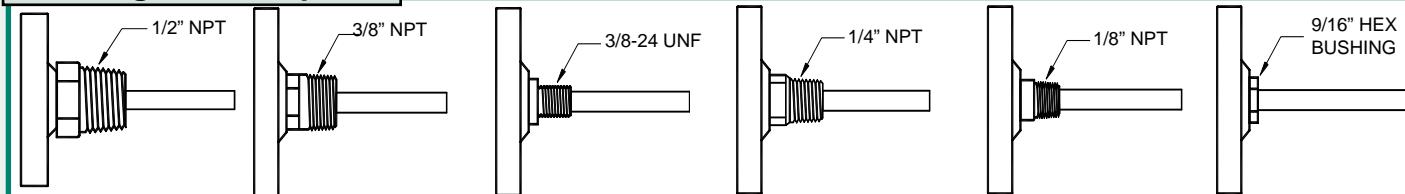

Model G - 1 11/16" Dial

Model H - 2 3/8" Dial
